It is not according the way the rest of the world is interpreting the domains.

It should be www.bbc.uk

Philips.com is the global site.

Philips.uk is the united kingdom site

Philips.nl is the dutch site

Philips.eu is the european site

Philips.co.uk is an invention from people not in touch with the rest of the world. Who are still living isolated on an island.

**We propose to take the same approach for two letter, one character and the other previously unreleased domains (e.g. pro.co.uk). Do you agree with this proposal?**

**The PAB recommended a cut off date for qualifying rights for IP rights holders. They suggested 1996 and 2002 as possible dates. What do you think would be a suitable cut off date?**

I would suggest to select every individual case on the oldest rights.

Companies etc first.

**Please give comments**

If Ringwood Brewery wants Ringwood.uk and the council wants it too, let the oldest one have it.

**We propose that initially commercial organisations should have priority in.co.uk and charities and not for profit organisations should have priority in org.uk. Do you agree with this approach?**

We propose to hold a Dutch auction for the general release (“landrush”) of domains not taken up by rights holders. Do you think there is a fairer way to allocate the first registration of these domain names?

Yes

No

We plan to run this whole exercise on a cost recovery basis, and any surplus funds generated from auctions would be donated to Nominet Trust, a charitable organisation established by Nominet with the objects including the education, relief of financial hardship and protection of children in the area of the Internet and information technology. Do you agree with this approach?
