

Sirs,

As a long standing, but smaller member of Nominet, UKS appreciates this consultation and the ability to contribute. As a company we must echo the sensible and considered contribution offered by Clive Feather. Of specific note with regards a weighted system, we agree that the following should be taken under serious consideration:

- change cap to votes cast, not allocated
- change cap size to increase blocking vote to ~4 (3-4%)
- adjustment to rules on connected members

A one member, one vote system has attraction, and is something we would be broadly in favour of exploring, however this brings specific challenges to stability unless the "connected member" term can be strengthened.

Daniel W Lowe
