

Preferred option: 3 (3% of cast)

Option 1 (10% of total) - makes it too hard to reach a majority.

Option 2 (10% of cast) - better than 1, but still gives too much power to a single member.

Option 4 (1 member 1 vote) - makes the membership fee the cost of a vote, and leaves the company open to tyranny by minority interests.

Comments: Perhaps alternative formulas would be useful rather than adjusting just the cap.
