

In response to the consultation on the Scope of Nominet

I support option 4 as I believe the M&A should not restrict Nominet's response to any opportunities that may arise in the future, with the following condition:

- Increasing the reporting back to the membership by having 2 AGMs per year rather than one.

The reason behind that with increased powers there is the risk of increased chance of deviation from a perceived route or actions nominet should, or should not take.
